

### **3 Tips for Returning Summer Vehicle Rentals**

**As the 2022 camping season ends, we would like to make a few suggestions regarding summer rented vehicles.**

1. We often hear from camps that the rental companies want to charge for damage after they have returned their vans and other summer rented autos.

**Once you return your vehicle(s), they are out of your hands.**

2. To prevent charges for damage not caused by your use, **we urge you to take complete photos of all sides of each vehicle, including the tops, just before they are returned.** This helps to provide proof of what was damaged during your use and what was not.

3. **Please remember that a van with multiple dents and dings cannot be put into your insurer as ‘one claim.’** Each collision is a separate claim and subject to its own deductible.

**Have a terrific and safe finish to your season!**
