

CAMPS, SPORTS AND OUTDOOR RECREATION WINTER EXPOSURES SURVEY

Date: _____ Account No. _____

Organization Name: _____

SECTION 1 - FREEZE

For buildings scheduled on your policy/quote, questions 1-3 apply to those buildings that have plumbing/water lines.

1. Are water lines drained for the winter season in all buildings? Yes No

If no, please provide the building name/number and answer questions a. - g. below:

For all buildings where the water lines are not drained:

- a. Do you have a written winter freeze preparedness plan that addresses actions to be implemented when temperatures drop below 20 degrees F for more than a 24 hour period? Yes No

If Yes, please provide a copy of the written plan.

- b. Are thermostats set at a minimum of 55 degrees? Yes No
- c. Are there periodic inspections during a freeze event (temperatures drop below 20 degrees F for more than a 24 hour period)? Yes No
- d. Are all water pipes insulated? Yes No
- e. Is the main water shut off valve identified for all buildings? Yes No
- f. Is there a reliable backup power source for heat if the power goes out? Yes No
- g. Other:

For any No responses on a. - f. above, please explain:

2. Are there any insured buildings that have plumbing or water lines but do not have heat? Yes No

If yes, which buildings:

Explain the steps taken to prevent freeze in these buildings:

3. Do any of the insured buildings have sprinkler systems? Yes No
If yes, which buildings and explain freeze prevention measures::

SECTION 2 - COLLAPSE/WEIGHT OF SNOW **N/A - if the insured location(s) are not subject to significant snowfall.**

4. Describe how buildings are protected against collapse due to weight of ice/snow?
- a. Clearing of Roofs:
- How often? _____
 - How soon after a significant snowfall? _____
 - At what snow depth level? _____
- b. Describe any enhanced inside structural support:
- c. List buildings with metal roof(s):
5. Do any buildings have flat roofs, and if so, how many? Yes - Number _____ No
6. Are gutters and downspouts kept clear and checked regularly to prevent the buildup of ice? Yes No
7. Are the attics of the buildings insulated which can assist with melting of snow on the roof? Yes No
8. Are any insured buildings inaccessible during the winter months? Yes No
If yes, which buildings:

What protection measures are in place for these buildings to prevent collapse due to heavy snow?
